Tel: 0121 214 8194

#### Meeting Venue

Lectures start 7pm

University of Birmingham B15 2TT

⋄

Refreshments are available prior to the meeting in the Shell lounge, Department of Mechanical and Civil Engineering, from 6:15 onwards.

**It's the last talk of 2016– Novelty jumpers optional!**

**Monday 5th December 2016**

**Geophysics for Geotechnics - teaching new dogs  
old tricks**

***Professor Nigel Cassidy Professor of Geotechnical Infrastructure  
Engineering***

***School of Engineering University of Birmingham***

#### Synopsis

The talk will look at traditional near-surface geophysical methods (gravity, seismics, resistivity) and how they can be used in novel ways to solve geotechnical problems.

#### About our speaker

Nigel Cassidy is Professor of Geotechnics and Infrastructure at the University of Birmingham and has more than 30 years' industrial and academic experience of engineering, geophysics and geotechnics. He currently a council member and trustee of the Geological Society of London and a senior member of the UK's Natural Environment Research Council strategic Training Advisory Board. He is passionate about all things geophysics and spends far too much of his time poking around holes in the ground.

The MGS is your local geotechnical society; we can only operate due to the time and effort of local professionals and enthusiasts. If you are interested in sponsoring the Society or a lecture, or indeed presenting a lecture please contact the Honorary Secretary.

Talk kindly sponsored by:
